Blue Cross Blue Shield of Massachusetts Formulary: Affordable Care Act (ACA) Covered Medication List

Last Updated: January 1, 2022

The following list includes medications that are covered by plans with the Blue Cross Blue Shield of Massachusetts formulary. These preventive medications are covered by the Affordable Care Act (ACA) and are available to eligible members at no additional cost. However, they aren't covered in full by all plans that are grandfathered under the ACA.

This isn't a complete list of covered medications, and inclusion on this list doesn't guarantee coverage.¹ You must have a valid prescription from a licensed health provider to receive coverage for these medications. Some medications may also be subject to pharmacy management programs, such as Step Therapy, Prior Authorization, or Quality Care Dosing, or have other coverage requirements.

NOTE: Some medications on this list may be considered non-covered, including new medications under review by Blue Cross, or may have their coverage changed. Brand-name medications may be removed from this list and considered non-covered, or may be covered at a higher cost share, if a generic version becomes available during the year. Your doctor may request an exception for a non-covered medication when medically necessary.²

Learn More About Your Coverage

For more information about these medications, look them up using the **Medication Lookup** tool at bluecrossma.org/medication.

1. Not all medications listed are covered by all prescription plans. Check your benefit materials for details.

2. If approved, you'd pay the highest-tier cost.
